How Tork PaperCircle® works

Our dedicated team supports you throughout setup, implementation and ongoing use to ensure your transition to a circular economy is smooth and efficient.

Your visitors and employees use the washrooms as usual, but throw their paper hand towel in a separate bin after drying their hands.

Our recycling partner collects the paper hand towels and brings them to the local Essity mill.

Cleaners empty the bins as usual but keep the hand towels separate on the trolley.

The Essity mill recycles the paper hand towels into new tissue products.

Your used paper hand towels are put back into the loop as new tissue products.

¹ Based on a survey of 41 current customers conducted in 2021. Available in select European countries.

² Potential CO2e savings from recycling of used hand towels compared to incineration with energy recovery. Estimation based a third party verified life cycle assessment for EU average conditions, where avoided processes from alternative use of fresh fibre and energy were considered. Potential savings in kg CO2e is calculated based on the result from the life cycle assessment and the collected weight reported to us. Estimate should not be used for carbon footprint calculations or reporting purposes.

Tork Microfibres

Microfibres are very fine so that they have a lot of surface area, which increases the absorbency. Gaps between split fibres in our microfibre cloths create pockets, which easily pick up dirt and dust and are also fine enough to pick up microbes. When woven together into a textile cloth, microfibrils create a cloth with excellent and efficient cleaning properties.

Tork offers reusable and disposable microfibre solutions that are low-lint and wipe away micro-organisms from surfaces.

Did you know that colors can have an important impact not only on how guests perceive a restaurant, but also on how they experience the taste and aroma of a dish? Pairing your food with the right color is a great opportunity to bring every course to life, ultimately improving the entire guest experience.

To help our customers create unique dining experiences, we teamed up with food stylist and chef Linda Lundgren, whose clients range from high-end restaurants to the international food industry and gastronomic magazines.

Use our color wheel, based on our Tork LinStyle® napkin range for inspiration on how to use colors to enhance flavours and fulfil the potential of every plate you create.

The natural choice

Tork Natural Napkins are developed with sustainability in mind. They are made from 100% recycled, unbleached and undyed material. Plus they are FSC® and EU Ecolabel certified, but also biodegradable and industrially compostable according to EN 13432. Tork offers natural napkins for self-service restaurants and for full-service restaurants.
